TOWN HEADS LIFT SUNDAY BAN, CUT FEES ON TAVERNS

Closing Time Not Changed; Limit Tavern Licenses to Five

Tavern fees for the Village of Antioch were reduced and the ban to keep them closed until noon Sundays was lifted following an investigation by the local licensing committee and vote by the board of trustees.

Closing time was not changed. During week night it will be 12 p. m. and Saturday night at 1 a. m.

The committee recommended: That the license of taverns be reduced to \$300 from \$350, a cut of \$50, with the privilege of paying in two installments.

Last year the taverns were closed until Sunday noon, but the board decided that since Antioch is part of the summer resort section, much of the revenue must be collected during the summer when business is at its peak.

The board also voted to limit the number of taverns within the village limits to five, and while there are four at present, the trustees accepted an additional license which will fill the quota for this year. The former ordinance limited the number to six.

Trustees Robert Wilton, L. D. Powles and Walter Scott comprise the licensing committee which offered these recommendations.

Antioch Girl Wins County Oratorical Contest of Legion

Hazel Olsen was adjudged winner of the oratorical contest sponsored by the Antioch unit of the American Legion Auxiliary in the high school last week; but Nora Arnold, who rated second, represented Antioch at the district contest in Lake Forest Monday and carried away top laurels.

The speaker's subject was: "My Responsibilities as an American Citizen." Because Hazel Olsen was ruled ineligible to compete for the county prize, being below the age limit requirement, Nora Arnold was given the opportunity to enter the Lake county contest. It is explained by Mrs. Arthur Maplethorpe, chairman of the sponsors. As winner of the county contest, she will advance to the district contest to be held in Quincy, where first place means a \$10 prize and a trial broadcast over the radio.

Those who served as judges of the local contest were: Mrs. George Garland, E. Morley Webb and Mrs. Walter Hills. Mrs. M. K. Phillips coached the contestants. Besides the two winners, Ina Quadenfeld and Ernestine Robbins competed in the high school contest.

COUNTY HEADS EXPECT \$30,000 IN REVENUE FROM TAVERN FEES

Board of Supervisors Expects 200 of them to Be Licensed

Approximately \$30,000 in revenue will be obtained by Lake county from the licenses of taverns, according to applications being received this week by the licensing committee of the county board of supervisors.

This means an increase of 25 or more licensed resorts, outside of the places in cities and incorporated villages, above the 175 in the county last year. County officials attribute this increase to the fact that during the past two years the Century of Progress exposition in Chicago lured thousands of persons from the resort area. Business men, they explain, are preparing to receive large crowds during the summer season and expect to be opened by Memorial Day.

While only a small number of the tavern owners who have applied have received licenses from the board because of the personal inspections being made to advise tavernkeepers of their safety regulations, it is expected that all taverns and resorts will be investigated by the middle of this month.

This measure is being taken to prevent such a disaster as occurred recently at the Rodeaus club west of Evanston in which several persons were burned to death and scores injured. Licenses will be issued for those taverns complying with the building, heating, sanitary and decoration regulations suggested by State Fire Marshal Sherman W. Coultas.

Supervisors Homer Cook, L. D. Hook, Walter Diesner and Frank Davis are the licensing committee members. They issue licenses on payment of the \$150 fee after a thorough inspection of the premises.

In connection with the event Principal Ralph E. Clabaugh sent out the following letter:

"All patrons and friends of the school are cordially invited to visit our school on Thursday or Friday, May 9 and 10. We have chosen these days for our annual 'Open House.' We plan to conduct school as nearly as possible as we do on other days. Please feel free to enter any room at any time and to leave at your pleasure; we hope you will visit as many rooms as possible. Teachers will be able to talk with you during the intermissions or after school.

"This year we are arranging an exhibit in the corridors of the work done in art during the year.

"Visiting hours are from nine to four on both days. It is hoped that a part of the visitors will avail themselves of the morning hours for their call.

"Anyone interested in the school is urged to pay us a call; it is not essential that he be a parent.

"Please be sure to stop at the office and sign the visitors' register."

Only watchmen on large estates or large commercial plants will be deputized, the sheriff declares. He intends to reduce the number now flashing deputy badges which were issued by the last administration. The number of bank guard deputies just named in the county total thirty-nine.

Robert Denman, Freshman, Is a High Point Winner for Antioch

Members of the team are Robert Denman, Harold Edwards, Willis Griffin, Glenn Griffin, and Donald Minto. Of the seven boys who participated from the fourteen schools represented, Robert Denman, a freshman of the local school, ranked fourth in the individual judging and received a beautiful ribbon as his award.

The local Dairy Judging team did some creditable work but failed by only 30 points of ranking amongst the five leading schools of the seven teams represented. The team consists of the following boys: Frank Verkest, Richard Waters, John Oaliger, D. Elferling, and Howard Bonner.

In summarizing the year's judging work in all divisions, the local school ranked in 6th position among the 22 schools of this section.

The next judging contest will be at the University of Illinois in June. Twelve boys from the local school will compete with some 200 schools there.

ALL-STARS MANHANDLE CHANNEL LAKERS 19-5

Bill Keulman embalmed the Channel Lakers' bats on the Grade school diamond Tuesday at twilight while his mates slugged out a 19 to 5 win for the Antioch All-Stars.

Keulman had things under control except for the seventh inning when the westsiders pushed four of their runs across the home plate. He had flawless support from his mates who snared several solidly hit balls to rout any attempted uprising by the Lakers.

Koukol, the losers' starting pitcher, offered a menu of tosses that the winners devoured with hits to far corners in the garden. He was succeeded in the sixth by Bud Kennedy who managed to spike the Stars' artillery to the extent of six counters for the rest of the game.

HOUSING RESULTS DEPEND ON PUBLIC, CIVIC LEADERS SAY

Antioch Campaign Nearly Ready for Formal Launching

The last of the exhibits and arrangements necessary to formally launch the National Housing program at Antioch are well on their way to completion, according to executive heads of the movement here.

The success of the plan, it was pointed out, rests in the hands of the people of Antioch. The Federal Housing administration, under whose jurisdiction the local committee operates, provides the plan and will give all possible cooperation. The real is up to the public, they explain.

The civic leaders agree that if all who are able to do so will take advantage of the attractive loan plan made possible by the administration, and repair, alter or improve their properties, benefit to the entire community will result.

It is estimated that there are very few buildings in Antioch and the surrounding community that do not need repairs of some kind. Some need complete remodeling to bring them up to the modern standard of living. Major repairs, such as ropping, re-roofing, re-flooring, etc., are necessary in many others. The remainder require minor repairs.

In addition, there are many buildings not really in need of repair, but which can be made more efficient, more comfortable or more beautiful through certain changes.

The local Better Housing committee does not wish to urge the property owners to rush into any ill-advised expenditures, but the members feel that where repairs or improvements are needed, now is the propitious time to go ahead with them.

Juniors Entertain Seniors At Prom, Banquet Saturday

Gasoline-drawn Jittrikshas will ramble as scheduled with high school juniors and seniors bound for the Junior Prom in the Antioch high school auditorium Saturday evening.

There had been some worry among the parties concerned that the annual party would be postponed due to after effects of the smallpox vaccination among students. Principal L. O. Bright, however, states that following a conference Thursday morning, the Prom will not be put off.

The auditorium is being transformed into a Japanese garden and Mikado for the evening. Paul Richey, Junior class president and Prom general chairman, is ready to nod the assemblage into activity with a grand march. The gay atmosphere of Fujiyama, Tokyo and Yokohama has been injected into the scene with multi-colored jack-o-lanterns and cherry blossoms decorating the room.

The juniors have likewise arranged a banquet for their senior guests at 7:30 o'clock. The diners will be attended by sophomore members of the school. Music for the dance will be furnished by the Hi-Halters orchestra from Chicago, starting at 9 o'clock.

Muskallonge Chases

Dog Out of River

Cuba, N. Y.—The Allegheny river has a dog fighting muskallonge—and lake it from Ray Moran, gravel dealer and amateur fisherman, that's not another fish story.

Moran was fishing in the river near here and his hunting dog went in for a swim. Soon he saw the dog racing wildly for shore, splashing and yelping as if a ghost were after her.

To his astonishment, Moran says he saw a huge muskallonge, almost half-way out of the water, pursuing the dog.

As the hunting dog clambered up the bank, Moran said, the muskallonge came in close to shore and stayed there for several minutes apparently challenging the canine to enter the water again.

Fish Dumb, but Seals and Elephants Never Forget

New York—This is going to be an awful shock to some people.

Stop making such a fuss over that pet goldfish.

He does not know you from the corner telegraph pole. What is more, he isn't ever going to, even if you feed him the choicest food three times a day.

The authority for all this disillusioning is Dr. Field Blair of the Bronx zoo. He reveals that the goldfish has no memory at all, very little intelligence and isn't even aware he lives in a glass house.

But the elephant! Well, sir, that is a different story. The old saying, "An elephant never forgets," is no joke.

"I know a man who used to have a trained seal act. He was forced to give it up and placed his seals in an aquarium."

"Several years later he visited the aquarium. The seals saw him and immediately began to do the act they had performed with him so long ago."

GOTHAM HAS CRUSOE IN ITS BACK YARD

Army Man Lives on Lonely Isle in East River.

New York—New York has a counterpart of Daniel Defoe's famous character, Robinson Crusoe, right in its back yard.

Lacking only the glamour of beautiful foliage, hidden caves, a white, sandy beach and lurking cannibals, John Robertson, William Smith leads almost as lonely an existence within a stone's throw of one of the world's largest metropolises as did the renowned inhabitant of the fictional island.

The island, 1111 block, a bare, treeless flat rock hardly more than an acre in size, is located in the East river. Around it swirl the treacherous whirlpools of Hell Gate.

For thirteen years Smith has inhabited this tiny island, as an employee of the army engineering corps. But instead of the one man who served Robinson Crusoe, Smith has twenty-eight "Fridays" at his beck and call and a fleet of ten vessels. They bring him his supplies.

For years Hell Gate channel has been cleared of submarine obstructions, but the terrific currents and dangerous cross tides make navigation at this point no child's play and it is Smith's job to watch for dangers to safe transit. There he can signal to stations ashore.

Although not part of his job, probably the most important task Smith performs is rescue work. Not a summer goes by that Smith and the men at his command do not pull at least a dozen persons from the river.

This modern Crusoe is only an eighth of a mile from Manhattan's towering skyscrapers, but he is a man alone, a hero unsung.

But, does he feel lonely? The answer is that he has been there thirteen years, any day of which he could have left.

Airplane Drops Yeast, Ending Bread Famine

Nelson, B. C.—Modern transportation facilities were used to bring a necessary ingredient to storm-bound Nelson and Trail.

Worried bakers of the district were overjoyed to find parcels dropped from a yellow airplane at Nelson and Trail contained yeast for which they had frantically wired to Spokane.

Shipments of yeast had been cut off for almost a week because train service was curtailed by snowdrifts after rain fell on record-breaking snowdrifts, but some one got an appeal through to Spokane over crippled telegraph wires.

Recently a mysterious plane flew over this city for half an hour. It suddenly swooped down toward the ice on Kootenay river and released a package attached to a small parachute. Four times the maneuver was repeated before the plane disappeared.

Woman's Glove Leads to Wife's Suit for Divorce

Cincinnati.—If Mrs. Elsie Bobe had pressed her husband's suit, she might never have filed suit for divorce from Otto Bobe.

In the course of her pressing, she found a pair of women's gloves in his pocket, according to her petition. He demanded them and she hid them, Mrs. Bobe says. And so he gave her a good "shaking," packed his clothes, left and hasn't returned to her or their children, she charges in her petition.

Old Stump, Sailors' Aid, Still Used as Landmark

Honolulu, Wash.—The stump of Grays Harbor's famous Lone Tree, which reportedly was used as a guiding mark by Capt. Robert Gray in 1792 when he entered the port, will still serve as a landmark for vessels.

All but eight feet of the tree was blown to the ground in a gale, but federal engineers erected a 30-foot tripod marker over the stump.

Skunk Emptied Church

Lewisburg, Pa.—Skunks are so numerous around Lewisburg that the city council named a committee to see what steps could be taken. The prevalence of the animals reached an climax when one of them became entangled in a heating pipe of a church and forced the congregation to retire.

Cincinnati.—A bequest of \$500 for establishment of a free hospital and clinic for dogs was contained in the will of Ida M. Cenne, pronounced here.

The Resumption Act

In 1874 Senator John Sherman of Mansfield, Ohio, introduced the famous Resumption Act, which passed the senate the same year and the house early in 1875. In 1877 he was appointed secretary of the treasury by President Hayes, and in that position had the unique experience of carrying out the crowning triumph of his fiscal policy which as senator he had originated and advocated.

Through his supervision the resumption of specie payments by the government was accomplished, despite the dismal forebodings of several practical, acknowledged financiers.

Edinburgh, Scotland, is one of the most beautiful cities in the world. It is called the modern Athens because of its topographical resemblance to the Greek city. Its historic castle, being built upon a rock similar to the Acropolis.

TOWN HEADS LIFT SUNDAY BAN, CUT FEES ON TAVERNS

Closing Time Not Changed; Limit Tavern Licenses to Five

Tavern fees for the Village of Antioch were reduced and the ban to keep them closed until noon Sundays was lifted following an investigation by the local licensing committee and vote by the board of trustees.

Closing time was not changed. During week night it will be 12 p. m. and Saturday night at 1 a. m.

The committee recommended: That the license of taverns be reduced to \$300 from \$360, a cut of \$60, with the privilege of paying in two installments.

Last year the taverns were closed until Sunday noon, but the board decided that since Antioch is part of the summer resort section, much of the revenue must be collected during the summer when business is at its peak.

The board also voted to limit the number of taverns within the village limits to five, and while there are four at present, the trustees accepted an additional license which will fill the quota for this year. The former ordinance limited the number to six.

Trustees Robert Wilton, L. D. Powles and Walter Scott comprise the licensing committee which offered these recommendations.

Antioch Girl Wins County Oratorical Contest of Legion

Inez Olsen was adjudged winner of the oratorical contest sponsored by the Antioch unit of the American Legion Auxiliary in the high school last week; but Nora Arnold, who raised second, represented Antioch at the district contest in Lake Forest Monday and carried away top laurels.

The speaker's subject was: "My Responsibilities as an American Citizen."

Because Inez Olsen was ruled ineligible to compete for the county prize, being below the age limit requirement, Nora Arnold was given the opportunity to enter the Lake county contest. It is explained by Mrs. Arthur Maples, chairman of the sponsors. As winner of the county contest, she will advance to the division contest to be held in Quincy, where first place means a \$10 prize and a trial broadcast over the radio.

Those who served as judges of the local contest were: Mrs. George Garland, E. Merley Webb and Mrs. Walter Hilla. Mrs. M. K. Phillips coached the contestants. Besides the two winners, Inez Olsen and Nora Arnold, the Robbins competed in the high school contest.

COUNTY HEADS EXPECT \$30,000 IN REVENUE FROM TAVERN FEES

Board of Supervisors Expects 200 of them to Be Licensed

Approximately \$30,000 in revenue will be obtained by Lake county from the licenses of taverns, according to applications being received this week by the licensing committee of the county board of supervisors.

This means an increase of 25 or more licensed resorts, outside of the places in cities and incorporated villages, above the 175 in the county last year. County officials attribute this increase to the fact that during the past two years the Century of Progress exposition in Chicago lured thousands of persons from the resort area. Business men, they explain, are preparing to receive large crowds during the summer season and expect to be opened by Memorial Day.

While only a small number of the tavern owners who have applied have received licenses from the board because of the personal inspections being made to advise tavernkeepers of their safety regulations, it is expected that all taverns and resorts will be investigated by the middle of this month.

This measure is being taken to prevent such a disaster as occurred recently at the Rendezvous club west of Evanston in which several persons were burned to death and scores injured. Licenses will be issued for those taverns complying with the building, heating, sanitary and decoration regulations suggested by State Fire Marshal Sherman W. Coultas.

Supervisors Homer Cook, L. D. Hook, Walter Dlesner and Frank Davis are the licensing committee members. They issue licenses on payment of the \$150 fee after a thorough inspection of the premises.

ALL-STARS MANHANDLE CHANNEL LAKERS 19-5

Bill Keutman embalmed the Channel Lakers' bats on the Grade school diamond Tuesday at twilight while his mates slugged out a 19 to 5 win for the Antioch All-Stars.

Keutman had things under control except for the seventh inning when the wackidlers pushed four of their runs across the home plate. He had flawless support from his mates who snared several solidly hit balls to rout any attempted uprising by the Lakers.

Koukol, the losers' starting pitcher, offered a menu of tosses that the winners devoured with hits to far corners in the garden. He was succeeded in the sixth by Bud Kennedy who managed to spike the Stars' artillery to the extent of six counters for the rest of the game.

HOUSING RESULTS DEPEND ON PUBLIC, CIVIC LEADERS SAY

Antioch Campaign Nearly Ready for Formal Launching

The last of the exhibits and arrangements necessary to formally launch the National Housing program at Antioch are well on their way to completion, according to executive heads of the movement here.

The success of the plan, it was pointed out, rests in the hands of the people of Antioch. The Federal Housing administration, under whose jurisdiction the local committee operates, provides the plan and will give all possible cooperation. The rest is up to the public, they explain.

The civic leaders agree that if all who are able to do so will take advantage of the attractive loan plan made possible by the administration, and repair, alter or improve their properties, benefit to the entire community will result.

It is estimated that there are very few buildings in Antioch and the surrounding community that do not need repairs of some kind. Some need complete remodeling to bring them up to the modern standard of living. Major repairs, such as repiping, re-roofing, re-flooring, etc., are necessary in many others. The remainder require minor repairs.

In addition, there are many buildings not really in need of repair, but which can be made more efficient, more comfortable or more beautiful through certain changes.

The local Better Housing committee does not wish to urge the property owners to rush into any ill-advised expenditures, but the members feel that where repairs or improvements are needed, now is the propitious time to go ahead with them.

Gasoline-drawn Jnriskas will ramble as scheduled with high school juniors and seniors bound for the Junior Prom in the Antioch high school auditorium Saturday evening.

The auditorium is being transformed into a Japanese garden and Mikado for the evening. Paul Richey, Junior class president and Prom general chairman, is ready to nod the assemblage into activity with a grand march. The gay atmosphere of Fillmore, Tokyo and Yokohama has been injected into the scene with multi-colored jack-o-lanterns and cherry blossoms decorating the room. The juniors have likewise arranged a banquet for their senior guests at 7:30 o'clock. The diners will be attended by sophomore members of the school. Music for the dance will be furnished by the Hi-Hatters orchestra from Chicago, starting at 9 o'clock.

THE PROCESSING TAX—GOOD OR BAD?

The average citizen has a vague knowledge of the fact that the Federal government is levying processing taxes on farm commodities in order to produce the wherewithal for pursuing the Agricultural Adjustment program. What he doesn't know is that these taxes are now one of the largest revenue producers the government has—and that a bitter war is slowly getting underway between the friends and opponents of the tax.

During the past 21 months, income taxes brought \$760,000,000 into the Federal till. Processing taxes brought in \$792,000,000. And, whether the tax is good or evil, it is an undeniable fact that every cent of that three-quarter billion came from the pocketbooks of American housewives. In theory, of course, the tax falls upon the food middlemen of the nation—the producers of smoked meat, the handlers of sugar, the bakers, the cigarette manufacturers. In actual practice, the cost of the tax is simply added to the selling price of the product. Example: On April 1, 1933, Mrs. America paid, on the average, 6.4 cents for a pound loaf of bread. In 1934, she paid 7.9 cents and today she is paying 8.3 cents. Not all of the increase can be laid to the processing tax on wheat, but a substantial part of it can.

Two hundred million dollars of the \$792,000,000 the processing tax has raised, according to the U. S. News, came from hogs. Two hundred million more came from cotton. A little less came from wheat. The remainder came from sugar, corn, tobacco, rice and peanuts.

Of the \$792,000,000, \$700,000,000 has been paid to the farmer. It is paid to him in fulfillment of a contract not to produce more or better food, but to produce less. He gets so much an acre for not producing cotton, so much for not raising hogs. And therein lies one of the grounds for the battle that is getting underway. A great many people think it not only unwise, but actually criminal, for the government to pay out good money to "bribe" producers to cut down their production. This group is now engaged with the group which says that non-production is essential in order to raise the prices of farm products to a profitable level.

That debate is largely theoretical. But there is much warfare to be anticipated over purely practical issues. For instance, in the past much of the American cotton production has gone into export trade. But, as processing taxes are added to the cost of cotton, prices must rise, and foreign buyers don't like that. Production abroad is stepped up, as other nations seek sources

of cheaper cotton. The result is that farmers find that, while prices are better, they are unable to sell—and they begin to doubt the wisdom of the tax.

Housewives discover that the tax forces up the price of bread and pork chops, amounts to a sales tax on the basic necessity of life, food. The result of that is a gathering of consumers, bent on eliminating the tax.

Even hog farmers, who are generally supposed to be among the greatest beneficiaries of the tax, are dubious. They think that pork processors are cutting down the price they pay for livestock in order to compensate for the tax, and so are taking it out of the farmer instead of the consumer and middleman.

All of this is felt back in Washington, where Senators and Representatives keep their ears to the ground. Result is a growing feeling on the part of many Congressmen that the tax should be repealed. Some of them are beginning to talk about it—others will line up behind them when the future of the tax comes up for Congressional consideration.

"CONGRESS SHOULD BE TOLD"

"Congress should be told," says the Manufacturers Record, "that the present confusion of Government has created the belief that the only certain results ahead are larger relief rolls and unbearable debt."

"That the only way to recovery is to abandon the fantastic cure-alls that have failed and promptly set about encouraging industry and capital."

"That industry, if unhampered by restrictive laws, will employ the idle."

"That investors are scared by the attacks of Government upon creative enterprise and will not venture into new fields."

"That 'reform' MUST wait upon recovery."

REFORMS MUST WAIT

Congress has been in session four months now, and the only major piece of legislation enacted is the four billion dollar relief measure. The Senate is showing little interest in the other measures which the Administration wants as part of its social program, but which other observers point out might be a deterrent to recovery. Billions of dollars of stored up demand awaits the loosening of the tide of private credit, and Democratic Senators are not inclined to further retard recovery by seeking to reform the entire nation at one session of Congress.

Every indication is, as viewed in Washington, that recovery is nearer than at any time in years if government will stop retarding the rise with reform legislation.

According to what General Hugh Johnson told the Senate Committee, to destroy the NRA would be like burning down your house to get rats out of the attic. But we never heard of the NRA having rats in its attic although some of its critics have been mean enough to say that it had rats in its belly.

President Roosevelt will personally greet Admiral Byrd when the latter returns from his long stay at the South Pole. Maybe the Admiral will have some new first hand information on frozen credit.

NEW KITCHEN CHARM IS READILY PLANNED

Added Conveniences Ease
the Daily Tasks of the
Housewife

Drab, dingy kitchens make a veritable ordeal of the task of preparing meals. Particularly is this true when the kitchen has a poor arrangement of equipment and is lacking in up-to-date facilities for the housewife. Kitchens of this type usually are those that were built years ago, before the modern kitchen improvements were available. Any old kitchen, no matter how great its shortcomings, can be transformed into a place of beauty and charm, and made comfortable and convenient. Why not include such a project as your part of Antioch's Better Housing Program, now under way?

If there is not enough natural light, windows can be enlarged or additional ones installed. Darkness can be further dispelled by placing a drop light over the stove or in other places where there is not sufficient light.

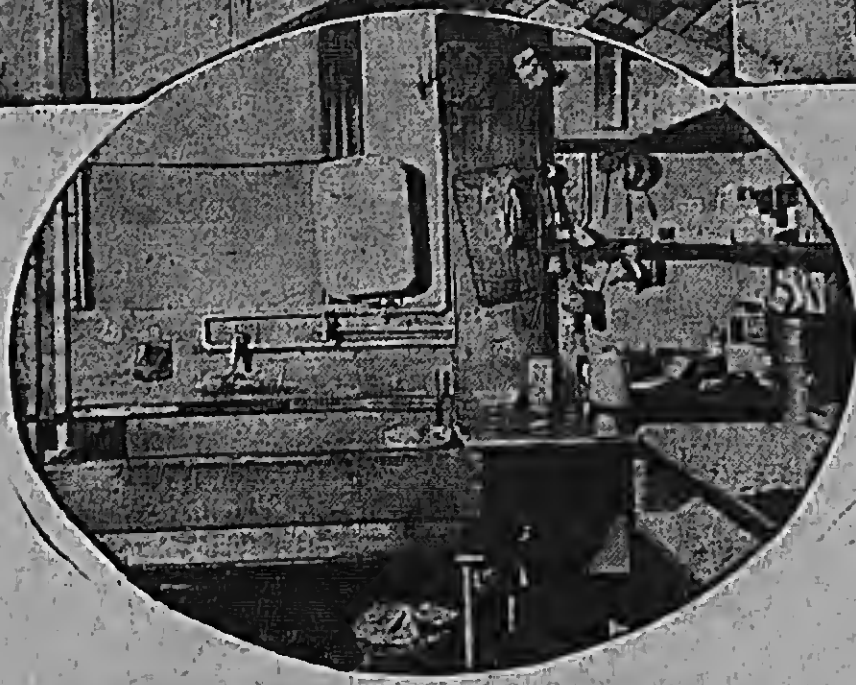

Cupboards, cabinets, shelves and bins can be built to provide for convenient storage of food, cooking utensils and dishes. If there is unutilized space beneath the drain board or the sink it can be used for a vegetable bin, and perhaps save many steps to the back porch or the basement.

Serving dishes stored in the old-fashioned cupboard in the dining room can just as well be placed in twin cupboards at each side above the sink.

At the right are actual photographs of a kitchen before and after modernizing. The new kitchen has all the latest conveniences: Built-in cabinets, built-in sink with large shelves and drain at a most convenient height, colorful linoleum floor, tile walls, built-in light above the sink, an automatic cooking range, mechanical refrigerator, built-in broom closet and ironing board—other conveniences.

How nice it is to have a place for everything, with no unsightly open racks or shelves as in the photograph of the old kitchen above.

What a pleasure it is to prepare a

What a transformation modern equipment and careful planning wrought in the old kitchen pictured above. The photographs are actual ones and illustrate how even the oldest kitchen may be brought up to date.

meal in a room like this!

You can buy a new kitchen now without down payment and on easy monthly terms through credit facilities opened up by the National

Housing Act. Ask your local bank or other financial institution cooperating with the Federal Housing Administration about their loans for modernizing.

Sharks Eat One Another.

Watchfulness, the law of the sea, applies to sharks as well as other fish. Their span of years—never yet counted by scientists—is dependent upon their own alertness, for, although only a shark can bite a shark, these monstrous fish are cannibals, and eat one another as well as everything else in the sea.

80 Bushels of Wheat: Net Profit Is \$23,577

Miles City, Mont.—Custer county's "net-raising" wheat industry came pretty expensive to the government this year, final check-ups showed. The total county production was 80 bushels—whereas the government paid \$23,577 for 85 per cent of the wheat that was not raised in Custer county this year.

Drought conditions combined with the AAA crop reduction program to result in the lowest wheat crop in the county's farming history.

"That will be fine; and be sure to tell the factory that I want a pattern suitable for putting in the bottom of my bird cage," said the lady.

Michigan, Indian Name
The name, Michigan, is believed by some authorities to have been derived from "mich-sag-yegan" of the Ojibway language. This does not seem at all unreasonable, as there are more than five thousand inland lakes in the state, to say nothing of the Great Lakes waters that come very near to surrounding it, for "mich-sag-yegan" means "land of lakes."

Gelatin A Valuable And Healthful Food

Combined with Other Food Adds Much to Variety of Menu

Gelatin is a valuable and easily digested protein food, as has been determined by careful technical research.

It is a household necessity, and is of great nutritive and dietetic value since it adds variety to menus and serves as a medium for the introduction of other foods into the system, particularly in desserts as a mold for fruits. It is recommended for invalids because of its digestibility and health-giving qualities.

Neapolitan Jelly

- 1 package prepared orange jelly powder
- 1 quart boiling water
- Whipped cream
- 1 package prepared raspberry jelly powder
- Shredded almonds
- Grated orange rind

Dissolve each package of jelly powder separately in a pint of boiling water, then divide each flavor into two portions. Into an oblong mold, previously wet with cold water, turn one portion of the orange jelly; as soon as the other portion is sufficiently cooled, whip it with an egg beater until light and foamy, then pour it into the mold over the clear jelly. On this place half the raspberry flavored mixture, whipping the remainder as for the orange and using it for the last layer. Chill, unmold and serve with grated orange rind and finely shredded almonds.

Jellied Vegetable Salad

- 1 1/2 tablespoons granulated gelatin
- 1/2 cup cold water
- Juice 1/2 lemon
- 1/2 teaspoon onion juice
- 1/2 teaspoon salt
- 1 teaspoon minced parsley
- 1/2 teaspoon paprika
- 1/2 cup mayonnaise or boiled salad dressing

- 1 diced pimiento or green pepper
- 1 cup mixed vegetables—diced carrots, peas, asparagus tops, sliced beans, etc.

Soften the gelatin in the cold water, then dissolve it in the boiling water, add the lemon juice, salt and paprika. Set aside until almost beginning to set, then add the mayonnaise or boiled salad dressing and beat the mixture until light and fluffy. Fold in the parsley, pimiento and vegetables and turn into a mold which has been dipped into cold water. Chill, unmold and garnish with lettuce or cream.

Jellied Hawaiian Fruit

- 1 package prepared lemon jelly powder
- 1 cup boiling water
- 2/3 cup diced canned pineapple
- 1 cup canned pineapple juice
- 1 tablespoon minced maraschino cherries
- 1 tablespoon prepared shredded coconut

Dissolve the jelly powder in the boiling water, add to it the pineapple juice; when almost ready to set, stir in the fruit and coconut. Turn into a mold previously wet with cold water, chill, unmold and serve with a garnish of cherries and whipped cream.

Diplomatic Jelly

- 2 packages commercial jelly powder
- 2 pints water

Dissolve the two packages of the commercial jelly powder separately—they may be of the same flavor or of contrasting flavors and colors. Put a layer (about 1/2 inch thick) of one of the powders into a mold which has been dipped into cold water—a glass bread pan is good. When this layer is set, place on it a smaller-sized mold of similar shape, pour the remaining portion of the jelly powder around this central mold and set aside to chill. When thoroughly cold, remove the central mold, which is easily done by pouring a little warm water into it, then lifting it out. Fill the cavity with the remaining jelly which has been dissolved, allowed to almost set, and then been whipped with cream and has then been whipped with cream.

Chicken or Veal Mousse

- 1 cup stock or half milk, half stock
- 2 eggs
- 1 tablespoon granulated gelatin
- 1/4 cup cold water
- 1/2 teaspoon salt
- 1 cup chicken or veal passed through food chopper
- 1/3 teaspoon pepper
- 1/2 teaspoon grated lemon rind
- 1 cup whipped cream

Apples in Jelly Mousse
6 medium sized apples
1 cup sugar
1 teaspoon grated lemon rind
1 cup water
1 package red commercial jelly powder
Juice of 1 lemon

Apple in Jelly Mousse

- 6 medium sized apples
- 1 cup sugar
- 1 teaspoon grated lemon rind
- 1 cup water
- 1 package red commercial jelly powder
- Juice of 1 lemon

Core, then peel the apples, lay them side by side in a baking dish and fill the spaces from which the cores were taken with the sugar with which the grated lemon rind has been mixed, sprinkling any remaining sugar over and around the apples. Pour in the water and lemon juice, cover and bake slowly until the apples are tender but not broken, basting them occasionally with the syrup in the dish. As soon as tender, remove from the oven to cool. Serve each apple in an individual dish surrounded by small cubes of red jelly.

A spoonful of orange marmalade may be placed on top of each apple and will greatly add to both flavor

Bath Sets Include Turkish Hand Towels

Hand towels are more and more coming to be simply junior bath towels. Housewives find that the absorbent and stimulating advantages of rough surfaces really need not be reserved only for the formal occasion of the bath. (Perhaps some of them are also thinking of the saving in laundry!)

Something Different

Roll your doughnuts while still hot in powdered maple sugar and cinnamon. This will add a new and delicious flavor.

Drawers That Stick

Rub that part of the drawer that sticks with a piece of moistened soap. Also soap the under part of the drawer where it slides.

To Remove White Spots from Furniture

A varnished finish turned white by action of water or hot dishes can be restored by rubbing liberally with a piece of flannel dampened with spirits of camphor. Wipe until thoroughly dry then follow with an application of furniture polish.

To Make Brooms Last Longer

Soaking a new broom in strong salty hot water before using toughens the bristles and makes the broom last much longer.

Oil Household Machinery

All household appliances need to be oiled occasionally. This includes sewing machines, carpet sweepers, vacuum cleaners, washing machines, electric fans, mixers and many other modern conveniences. Sewing machines oil should be used. You can save repair bills by noting on a small tag attached to the machine, the date of each oiling.

When Paper Is Stuck Fast

Paper stuck fast to the polished top of a table or bureau can be easily removed by putting a few drops of sewing machine oil on the paper and rubbing gently with a soft cloth.

Invention of Lace

Germany claims the invention of lace. A tombstone in Annaberg reads: "Here lies Barbara Uttman, died 14 January, 1575, whose invention of lace in 1561 made her the benefactress of the Harz Mountains." Barbara Uttman, however, learned to make pillow lace from a Bretonnais exile. She set up a workshop in Annaberg employing 30,000 workers. French refugees in northern Germany improved lace-making there and Italians influenced work in Bavaria and Saxony, but German lace never acquired artistic reputation outside of Germany.

Purple in Snail Shells

In the days of ancient Rome the purple in the shell of certain snails was used in the making of Tyrian purple, a dye reserved for the nobility. The snail used this ink to create a smoke screen about itself in time of danger. Other species of snails are known to bear poison glands which enable the snail to effect a "stream of poison" several inches. The highly ornamental shells of several species are used as umbrella handles.

Meaning of "Junkie"

The word junkie as often applied to congress was originally applied to a banquet, or a picnic or excursion with feasting but it has come to mean a trip at public expense by government officials to some distant post territory or public works for the purpose, they claim, of investigating conduct or for inspection. Congressmen, especially, have been noted in the past for their junkies to distant regions by the American flag—Pathfinder Magazine.

Respect Women or Fail

The women of Ball receive the most perfect respect from their menfolk. Although every girl goes about naked from the waist upwards, street insults of the type common in Europe are unknown. Before marriage a girl is free to take her choice of lovers, but once she has come to a decision she must remain faithful, or the punishment is death.

"Fiddler's Green"

"Fiddler's Green" is the humorously imagined Elysian fields of sailors and vagabond craftsmen, where credit is perpetually good and there is always a lass, a glass and a song.

3 cups boiling water

Core, then peel the apples, lay them side by side in a baking dish and fill the spaces from which the cores were taken with the sugar with which the grated lemon rind has been mixed, sprinkling any remaining sugar over and around the apples. Pour in the water and lemon juice, cover and bake slowly until the apples are tender but not broken, basting them occasionally with the syrup in the dish. As soon as tender, remove from the oven to cool. Serve each apple in an individual dish surrounded by small cubes of red jelly.

A spoonful of orange marmalade may be placed on top of each apple and will greatly add to both flavor

The Salt-Water Pike

The barracuda is a salt-water pike. In general conformation the fish closely resembles a big, great northern pike or muskellunge. It is gray, marked with black on the back, shining through silver to white on the stomach. It is considered one of the most savage fish that swims and its great snapping mouth, armed with sharp slashing teeth, make it an instrument of destruction probably not equaled by any other fish its size. While an in ferior hunter in many game fish found in the same water, its strike is terrific. It hits a trolled lure or bait with a viciousness calculated to destroy and does not hesitate to maul other fish nearly or quite its equal in size.

Dogs Have Topknot

Many dogs of the Mexican hairless variety are created with a topknot and carry a tuft of hair at the tip of the tail. In others, it is a brightly and upright. The eyes, lashed, are yellow, hazel or dark, bordered with pink or dark rims like that of an impatient race horse. The servos tremor of the muscles and shivers is characteristic. Not classed for any particular utility, he is considered, however, a good hunter of rabbits and rats. His owners attest that his intelligence, brightness and affection more than repay the tolerance of his unpropitious appearance.

The Ace of Spades

The ace of spades was called Spadille for the games of omhre and quadrille, and was used as an ingredient, together with two adders, twenty-four spiders, seven loads, and a ewe lamb's heart, for the concoction said to have assisted the Corsican witch to foresee Napoleon's career.—Pearson's Weekly.

Navy Uses Much Tin

Tin is a strategic material in the United States navy. It is necessary to its proper maintenance and operation of the navy in time of war. The principal items needed by the navy which require tin for their manufacture are containers for food, grease and oil; brass for bolts, nuts, screws, rivets, pipe, valve and flanges; solders and anti-friction bearing metals; manganese bronze and condenser tubes; airplanes and other implements of naval warfare.

A Forgotten Adviser

Alexander Hamilton, the great first secretary of the treasury, had a son, James A. Hamilton (1788-1878), a remarkable, little-known or remembered mysterious figure whose advice was listened to by many administrators and Presidents of both political parties.

Has Many Habits

The barracuda is one of the most generally distributed fish in southern Florida waters. It is found in the streams and on the reefs during the fall and winter months and in the bays and sounds in considerable quantities during the summer.

Harvest of All Dogs

The harvest of all dogs are the St. Bernards, which range in weight from 100 to 225 pounds. The largest dogs are the Irish wolfhounds, but they do not weigh as much as the St. Bernards, being rangier and taller.

Poetic Justice
